

Downloading an Mp3 file to a Mac, iPad or iPhone.

It is a very easy process once you know what to do!

1. On your MAC or the device you want to download the audio book or MP3 file to, open your emails find the email from GrowMySalonBusiness.com and click on the download link provided by us. *Please note that you cannot download directly from the link in the email onto your iPhone it has to be downloaded onto a computer or iPad first and than transferred onto your iPhone.
2. Once you have clicked on the link you will see a blank page the file is downloading you will see a download bar in the top right hand corner. (as below)

3. The bar tells you how long your download has until it is fully downloaded, you can also click on the download icon and it will give you the estimated time remaining (see below)

4. Please be aware that depending on your internet speed this can take anywhere between 5 and 15 minutes.
5. Once it has finished downloading you will find it in your download tab (See Grow 1 MP3 Folder 161.7 MB as above in step 3)
6. You can either drag the folder onto your desktop or drag it directly into itunes, once it is in itunes you will be able to listen to it across all your devices including your iphone whenever and wherever you like.
7. To listen to an Audiobook on your iphone make sure that itunes on your phone is synced with itunes on the device that you downloaded the audiobook on to.
